

What CVSSense Pro 0.8 gives your team today, and what comes next.

Version 0.8 is the first release for on-premises customers: a complete CVSS v4.0 workspace with guided scoring, review, reporting and enterprise sign-in, installed on your own server in minutes.

Available in 0.8 **SHIPPED**

Decision Assistant

Plain-language questions for **7 target types** lead every analyst to the official CVSS v4.0 result.

AIka text analysis

Offline suggestions from the finding text, with the trigger words; applied only after you confirm.

Four-eyes review

Review workflow, **locked results** and a deliberate reopen make the final score trustworthy.

Reports & dashboard

Severity and **OWASP Top 10** charts, a personal dashboard, export to PDF, JSON and Markdown.

Hardened by default

BSI password policy, lockout, session overview, read-only container, **signed integrity check**.

Installed in minutes

One Docker image and a **browser wizard**: license, address, HTTPS mode, first admin.

Manual Scoring

All metric groups on one screen, **vector import**, presets and Modified Base for your context.

Full decision history

Every metric keeps **who set it, when and why**, plus notes, open questions and screenshots.

Projects & permissions

Group assessments per customer or product, with **rights per user** and roles.

SSO & two-factor

OpenID Connect (Entra ID, Google, Keycloak, Okta) and **TOTP 2FA**, enforceable by admins.

Encrypted backups

Daily and on-demand backups, **encrypted**, restored from inside the app.

Four languages, zero cloud

English, German, French and Japanese; **no internet, no telemetry**, your data stays in house.

Coming next **ROADMAP**

Our next releases build on customer feedback from 0.8. Priorities can shift with that feedback; no dates are promised.

NEXT

Images in the questions

- Pictures and diagrams next to each Decision Assistant question.
- Shows what "adjacent network" or "user interaction" looks like in practice.
- Faster, more confident answers for new analysts.

NEXT

Language fixes

- Native-speaker review of the French and Japanese texts.
- Setup wizard in all four languages.
- More AIka keywords per language for better suggestions.

FOLLOWING

UI/UX refinements

- Clearer layouts and fewer clicks in daily scoring.
- Polished dashboard, reports and settings pages.
- Improvements based on what our customers report.
